Office of Legislative Counsel

Friday - 18 April 1958

Four copies of our revised comment on the education bills, H. R. 10341 and H. R. 10278, were hand carried to Mr. Frye in the Bureau of the Budget.

25X1 [redacted] (Office of Logistics) called to indicate his interest in H. R. 11672 and H. R. 11673. Copies of these bills are being sent to [redacted] for comment.

25X1 Col. Beatwright of the Department of the Army called in connection with the [redacted] case. He made reference to the Legislative Counsel's discussion with Senator Williams who is still interested in receiving a legal opinion from the Army on its authorities to hospitalize American citizens overseas. Col. Beatwright indicated that any opinion issued by the Army would have to be based upon a similar legal opinion issued by the Department of State. He feels that State and the Army are at odds in this matter and sees no point in submitting conflicting opinions to the Senator. He has suggested that this office make arrangements with the State Department for the Army people to get together with State and draw up a joint legal opinion. Mr. Houston is making arrangements with Mr. Cameron in the State Department.

25X1 [redacted] (Budget Officer) advised that he had received a call from his contact in the Bureau of the Budget to the effect that they were still desirous of a stronger comment from this Agency supporting the administration bill on education. [redacted] was not sure whether his contact had seen our most recent proposal on the education bill; therefore, he is checking further with Budget and will be in touch with us.

Pursuant to the request from Miss Lynhard in the office of Senator Wayne Morse, there was hand carried to the Senator's office a map of the world.

The transcripts for the hearings on March 13 and 20th before the Senate Disarmament Subcommittee which had been borrowed from the Senate Foreign Relations Committee were returned to Mr. Darrell St. Claire by hand today.

Delivered to Mr. Al Westphal of the House Committee on Foreign Affairs the material he had requested as a result of his conversation on 17 April 1958.
